

From Bud Maimone:

I am looking for a mechanically inclined individual. I am the founder of Cobra Motorcycles and manufactured them in our facility. Currently we have many different projects, one of them being my patented 2 stroke engine crankcases along with my own crankshaft design. I recently have been nominated for the AMA (American Motorcycle Association) Motorcycle Hall of Fame.

We are looking for someone that is willing to learn, has knowledge of reading micrometers, & can hold tolerances. Should be able to read and understand blueprints and have the ability to program or the willingness to learn.

Many of the machines we have are listed on our website, some of them are not because we need to update the site. You are welcome to visit if you want to see what we have going on. Here you would see we have a relaxed work environment with no high pressure.

We are willing to do training for qualified individuals. We aren't looking for a button pusher, we are looking for someone eager to learn. This job would offer a great opportunity for someone looking to advance in machine trades.

Our website is [Home • ESP Machining & Mfg, Inc.](#)
Call 330.207.3844 with any inquires.
